

StepCat Quick Start Guide

StepCat Calculator v200

StepCat is an independent calculation and recordkeeping tool. Estimates are projections. Use Finalized mode and the Official Total Earned Amount for confirmed records.

Quick Start

- Choose Estimate or Finalized.
- For Estimate, select Member or Non-Member and enter Entry Fee, Gross Pot, and Eligible Players.
- For Finalized, confirm Game Type and enter Entry Fee plus the Official Total Earned Amount.
- Official Total Earned Amount means the total returned, not just extra profit.
- Use Disqualified / Lost Entry Fee only when the full Entry Fee was forfeited.
- Use Copy This Sheet Row to copy the Sheet Row Preview as plain values.

Player Counts

- Total Players = everyone who entered the challenge.
- Eligible Players = players still eligible to win / not disqualified.
- Eligible Players drives the payout estimate.
- Total Players is useful context for elimination tracking, but it does not change the payout estimate.

Warm-up Week Estimate Tip

For best estimate accuracy, add new challenges after warm-up week ends. Gross Pot and Total Players are usually more reliable after warm-up week. Update Eligible Players as the challenge progresses.

Spreadsheet Template

In the v200 template, row 4 is the header row. Row 5 and below are for game records. Paste StepCat rows starting in A5.

For a blank or custom sheet, Copy Header can be pasted wherever you want the table to begin. Copy Header only copies column names; it does not add template formulas.

Formula Columns

Formula columns calculate for you. In Game Records, the formula columns are:

- J = ROI
- K = Result
- Q = Challenge Length
- U = Net Profit
- V = Eliminated Players
- W = Elimination Rate

Do not type over formula cells unless you want to replace the formula.

If a formula cell is blank or missing, use another row where that same column is working, then copy that formula into the blank cell.

StepCat copied rows already include ROI and Result for completed entries. The template formulas are mainly helpful for older, manual, or in-progress rows.

Clear Card vs Delete

- Clear Card removes the visible result card only. Saved History is not deleted.
- Delete permanently removes that saved history entry.

Result Logic

- Profit: Earned is greater than Entry Fee.
- Draw: Earned equals Entry Fee, or an estimate would otherwise be at/below Entry Fee.
- Disqualified / Lost Entry Fee: only when the full Entry Fee was forfeited.
