

StepCat Quick Start Guide

StepCat Calculator v145

StepCat Calculator v145.

Independent project notice: StepCat is an independent calculation and recordkeeping tool. Estimates are projections. Use Finalized mode and the Official Earned Amount for confirmed records.

What's New

The Profitability Analysis template and spreadsheet workflow have been updated.

- Built-in formulas now support in-progress games and older manual entries added before using StepCat.
- When a game ends, update Earned and either Profit, Draw, or Lost. ROI and Result can update from the spreadsheet formulas.
- The recommended StepCat copy order now matches the template: Game Name, Start Date, End Date, Payment Type, Entry Fee, Earned, Profit, Draw, Lost, ROI, Result.
- Download the updated Profitability Analysis template if you have an older version.

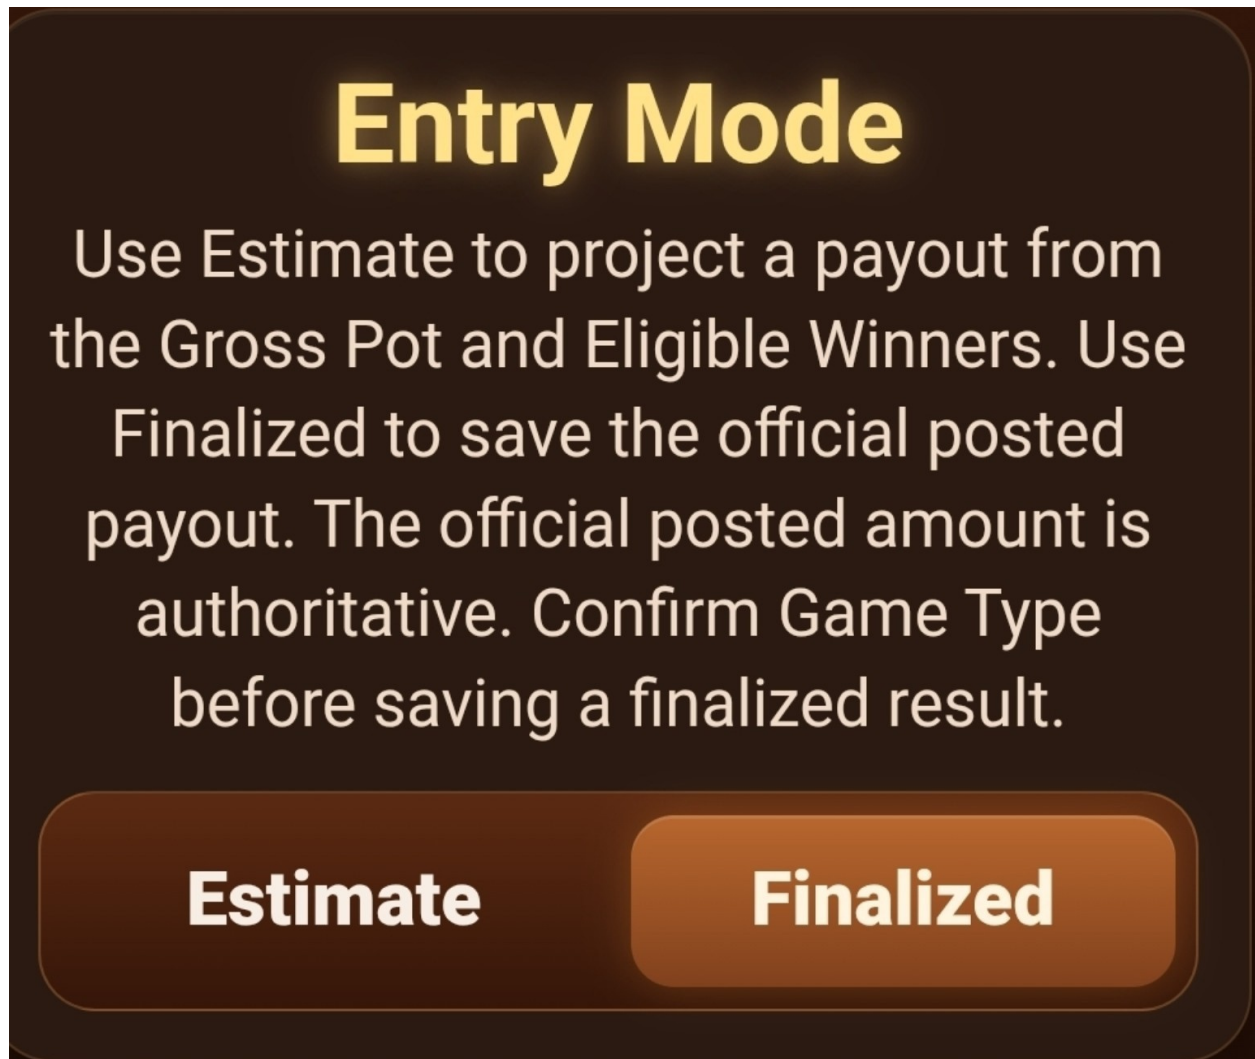

Quick Start

1. Choose Estimate or Finalized.
2. For Estimate, select Member or Non-Member and enter Gross Pot, Entry Fee, and Eligible Winners.
3. For Finalized, confirm Game Type and enter Entry Fee plus the Official Earned Amount. Use Disqualified / Lost Entry Fee only when the full fee was forfeited.
4. Add optional details when useful, then tap Calculate & Save.
5. Use Saved History and Spreadsheet Copy Setup to copy results.

Video tutorial note: The current StepCat v145 video tutorial is an early working draft. It can be used now, but it may be updated later for clarity or completeness.

A dark brown rounded rectangle containing the title 'Entry Mode' in large yellow font. Below the title is a paragraph of white text explaining the difference between Estimate and Finalized modes. At the bottom are two large, rounded buttons: 'Estimate' in white text on a dark brown background, and 'Finalized' in white text on a lighter brown background.

Entry Mode

Use Estimate to project a payout from the Gross Pot and Eligible Winners. Use Finalized to save the official posted payout. The official posted amount is authoritative. Confirm Game Type before saving a finalized result.

Estimate **Finalized**

Choose Estimate for projections or Finalized for confirmed records.

Estimate Math

Game Type

Non-Member Estimate: 15% is subtracted from the full Gross Pot before dividing by Eligible Winners.

 **Non-Member**  **Member**

Estimated Earned = (Gross Pot - (Gross Pot × 0.15)) ÷ Eligible Winners

Hide Math

Non-Member Estimate

1. Start with the full Gross Pot.
2. Subtract 15%.
3. Divide the adjusted pot by Eligible Winners.

The result is an estimate. Use Finalized mode for the official posted payout.

Non-Member estimate math.

Game Type

Member Estimate: the full Gross Pot is divided by Eligible Winners.

 **Non-Member**  **Member**

Estimated Earned = Gross Pot ÷ Eligible Winners

Hide Math

Member Estimate

Divide the full Gross Pot by Eligible Winners.

No 15% deduction is applied.

The result is an estimate. Use Finalized mode for the official posted payout.

Member estimate math.

Enter Game Information

Game Entry

Enter game numbers

REQUIRED

Estimate requires Gross Pot, Entry Fee, and Eligible Winners. Total Players is optional and does not affect the estimate.

Gross Pot Required

Enter the full pot before any deduction. Non-Member estimates subtract 15% from the full pot. Member estimates use the full pot.

Gross Pot

Entry Fee Required

Actual amount you paid to join. Use 0 for free or covered entries.

Entry Fee

Eligible Winners Required

Enter the number of players still eligible to win. StepCat divides the pot after the 15% deduction by this number.

Eligible Winners

Total Players Optional

Optional. Used only to show how many players were disqualified. It does not change the payout estimate.

Total Players

Official Earned Amount Optional
in Estimate

Leave blank to use the estimated return. Enter a confirmed amount only when available.

Official Earned Amount

Returns at or below the Entry Fee are recorded as Draws. Turn on Disqualified / Lost Entry Fee only when the full Entry Fee was forfeited.

Estimate required fields.

Optional Details

OPTIONAL

Optional Details

Game name, payment type, dates, and disqualification status.

Close

Optional Details includes Game Name, Payment Type, Date Format, Game Start Date, Game End Date, and Disqualified / Lost Entry Fee. Leave optional text and date fields blank when they are not needed.

Game Name

Optional

A name or label for this challenge.

Game Name

Payment Type

Optional

Examples: Cash, Game Points, Promo Credit, or Free Entry.

Payment Type

Disqualified / Lost Entry Fee

☐

Turn this on only when the full Entry Fee was forfeited because the challenge was disqualified. This overrides the normal Draw result.

Date Format

Optional

Choose how dates appear in Saved History and copied spreadsheet rows.

MM-DD-YYYY

Game Start Date

Optional

The date this game begins.

mm/dd/yyyy

Selected start date: none

Game End Date

Optional

The date this game ends.

mm/dd/yyyy

Selected end date: none

Date format controls how dates copy out. End date cannot be before start date.

Optional details, dates, and disqualification status.

Finalized Game Type

Game Type

**Non-Member finalized record.
Game Type is saved for reference;
the Official Earned Amount
determines the result.**

**Non-
Member**

Member

**Finalized result = Official
Earned Amount**

Finalized mode: confirm the game
type before saving. The last
selected type is remembered.

Confirm Non-Member

Show Math

Confirm the remembered Game Type before saving a finalized result.

Finalized Game Entry

Game Entry

Enter game numbers

REQUIRED

Finalized requires an Entry Fee. Enter the Official Earned Amount for a completed game, or turn on Disqualified / Lost Entry Fee if the full Entry Fee was forfeited.

Entry Fee

Required

Actual amount you paid to join. Use 0 for free or covered entries.

Entry Fee

Official Earned Amount

Required in Finalized

Enter the confirmed amount shown after the game is finalized. This directly determines Earned, Profit, ROI, and Result.

Official Earned Amount

Enter the Official Earned Amount for a completed game. If the full Entry Fee was forfeited, turn on Disqualified / Lost Entry Fee instead.

Returns at or below the Entry Fee are recorded as Draws. Turn on Disqualified / Lost Entry Fee only when the full Entry Fee was forfeited.

OPTIONAL

Optional Details

Game name, payment type, dates, and disqualification status.

Open

Finalized Game Entry.

StepCat Quick Start Guide • v145 • 7

Finalized Requirement

Finalized requires an Entry Fee. Enter the Official Earned Amount for a completed game, or turn on Disqualified / Lost Entry Fee if the full Entry Fee was forfeited.

Finalized requirement reminder.

Calculate and Save

Calculate Result

Calculate & Save

Calculates, validates, and saves one result. Estimate results are projections; Finalized results use the official posted amount. Then copy the latest row and paste into Google Sheets.

Calculate, validate, and save one result.

Spreadsheet Copy Setup

Optional. Customize row 1 only.

Saved result rows keep the same order.

Customize spreadsheet header☒

Include header row with Copy All Saved Rows☐

Core fields stay in the default order. Turning a core title off leaves its header cell blank so rows remain aligned. Optional detail fields are added after Result only when selected.

Profitability Analysis template: use this main row order: Game Name, Start Date, End Date, Payment Type, Entry Fee, Earned, Profit, Draw, Lost, ROI, Result. Leave the header-row option off when pasting result rows into an existing sheet.

Earned is the total amount returned, including the recouped Entry Fee and any Profit. **Profit** is the extra amount won above the Entry Fee.

Draw shows the Entry Fee recouped. **Lost** shows the Entry Fee forfeited when Disqualified.

Spreadsheet Copy Setup explains the recommended Profitability Analysis template row order and what Earned, Profit, Draw, and Lost mean.

Spreadsheet Copy Setup - Selected Fields

Game Name	Start Date
End Date	Payment Type
Entry Fee	Earned
Profit	Draw
Lost	ROI
Result	Game Type
Gross Pot	Adjusted Pot
Eligible Winners	Total Players

Select the main fields through Result for the standard template paste order. Optional detail fields can stay off unless your sheet has matching columns.

Spreadsheet Copy Setup - Notes and Buttons

Older spreadsheet rows: entries added before using StepCat may need spreadsheet formulas if ROI or Result were left blank. StepCat exports calculated values for new rows, but it cannot update rows already pasted into your spreadsheet.

In-progress rows: if a game is already listed in your spreadsheet, update the existing row with Earned and either Profit, Draw, or Lost. ROI and Result can calculate from spreadsheet formulas.

Extra header cells at the end

Notes, Paid?, Screenshot Link

Copy Header **Save Header Setup**

Reset Header Setup

Copy Header copies row 1 only. Add custom cells at the end if needed.

Older manual rows and in-progress rows can use spreadsheet formulas for ROI and Result. Copy Header affects row 1 only.

Profitability Analysis template: use this main row order: Game Name, Start Date, End Date, Payment Type, Entry Fee, Earned, Profit, Draw, Lost, ROI, Result. Leave the header-row option off when pasting result rows into an existing sheet.

Older spreadsheet rows: entries added before using StepCat may need spreadsheet formulas if ROI or Result were left blank. StepCat exports calculated values for new rows, but it cannot update rows already pasted into your spreadsheet.

Help, Guides & Feedback — Updated Drawer

The updated Help drawer keeps the existing content and layout while using the warmer StepCat button colors.

Updated Help drawer top area with warm StepCat colors and the Help-based install/add-to-home-screen option.

Install StepCat or Add to Home Screen in Help

Install StepCat or Add to Home Screen remains available inside Help, Guides & Feedback when supported by your browser.

Quick Start and Documentation

Quick Start & Documentation

Use these links to learn StepCat, download the guide, or review the complete documentation.

1. Choose Estimate or Finalized.
2. For Estimate, choose Member or Non-Member, then enter Gross Pot, Entry Fee, and Eligible Winners. Non-Member estimates subtract 15% from the full pot; Member estimates use the full pot. Total Players is optional.
3. For Finalized, confirm the remembered Game Type, then enter Entry Fee and the Official Earned Amount. The official posted amount is authoritative. Pot and winner information are not required for the finalized calculation.
4. Tap Calculate & Save. A return equal to or below the Entry Fee is recorded as a Draw unless Disqualified / Lost Entry Fee is enabled.
5. Use Copy Header in Saved History to set up row 1. Use Copy Latest Row for everyday entries, or Copy All Saved Rows to copy every saved result.

Quick Start instructions and guide buttons, including the white-text Quick Start PDF download button.

Spreadsheet and Profitability Tools

Spreadsheet & Profitability Tools

The optional blank template turns completed StepCat records into a longer-term game analysis.

StepCat calculates before you paste: Adjusted Pot, Earned, Profit or Draw/Lost amount, ROI, and Result.

The template calculates after you paste: Challenge Length, Net Profit, Eliminated Players, and Elimination Rate. Summary, Game Comparisons, and Best Results update from the completed records. It does not recalculate Adjusted Pot.

For everyday use, copy the newest result and paste it into the next empty row. Use Copy All Saved Rows only for a first import or batch transfer; repeatedly pasting the same full history creates duplicates.

Download Blank Profitability Template

Optional spreadsheet for tracking copied StepCat results.

Spreadsheet and profitability tools, including the blank profitability template download.

Optional Profitability Analysis Template

The blank analysis template is optional, contains no personal game records, and does not change StepCat v145.

1. For the main template columns, use this StepCat row order: Game Name, Start Date, End Date, Payment Type, Entry Fee, Earned, Profit, Draw, Lost, ROI, and Result.
2. Leave the header-row toggle off when copying rows into the template.
3. Paste completed StepCat rows into Game Records starting in cell A5.
4. Game Type, Gross Pot, Adjusted Pot, Eligible Winners, and Total Players are optional extra detail fields. Only include them when your spreadsheet has matching extra columns.

StepCat supplies copied values: Estimate rows include the Adjusted Pot and estimated Earned amount. StepCat also supplies Profit, Draw/Lost, ROI, and Result before the row is copied. For games already listed as in progress, update the existing row with Earned and either Profit, Draw, or Lost; ROI and Result can calculate from spreadsheet formulas.

Template-only automatic fields: Challenge Length, Net Profit, Eliminated Players, and Elimination Rate. The template stores the copied StepCat values and does not recalculate Adjusted Pot. Older manual entries added before using StepCat may need formulas if ROI or Result were left blank.

- **Count Source:** Reported, Estimated, or Partly Estimated.
- **Confidence:** High, Medium, or Low for estimated player counts.
- **Notes:** Optional explanation of an estimate or unusual result.

Downloads: [StepCat_Blank_Profitability_Analysis_Template.xlsx](#) and [StepCat_Quick_Start_Guide_v145.docx](#) are available from the Help drawer.

Which StepCat Row Should You Paste?

The Result Card and its matching Saved History card are two views of the same saved calculation.

- **Routine use:** Tap Copy Latest Row and paste it into the next empty Game Records row. Use Copy Row for a specific older Saved History entry.
- **Complete-history workflow:** Keep every Saved History entry as a local archive. After the first full-history transfer, add future games one row at a time.
- **Transfer-queue workflow:** Use Copy All Saved Rows to transfer several unpasted entries together.
- **Verify before deleting:** Confirm that every row pasted into the correct columns. Individual Delete actions are permanent, so delete transferred entries only after verifying your spreadsheet backup.
- **Prevent later duplicates:** Leave only untransferred entries in Saved History before the next full-history copy.
- **Important:** Individual Delete actions permanently remove that saved StepCat entry and cannot be restored with Restore. Clear History is different: it keeps one restore backup, so the Restore button can bring back the most recently cleared history. Deleting an entry does not remove a row already pasted into the spreadsheet.
- **Use the buttons:** Do not manually copy the visible Result Card text; the copy buttons create the aligned spreadsheet row.

Storage and Safety

- Saved History, inputs, and preferences are stored locally in the current browser.
- Copy important saved rows before clearing browser or site data.
- Verify spreadsheet transfers before deleting individual Saved History entries. Individual Delete actions are permanent. Clear History can be restored with Restore because it keeps one restore backup on this device.
- End Date cannot be before Start Date.
- Restoring default settings does not erase Saved History.
- StepCat is independent and is not affiliated with, endorsed by, or sponsored by any game or challenge platform.

Sending Feedback

Tap Write Feedback, enter your message, and tap Send Feedback. StepCat opens your device's default email app with the subject and message prepared. Review the email and send it manually; StepCat does not send feedback automatically.

Figure: Enter a message, then tap Send Feedback.

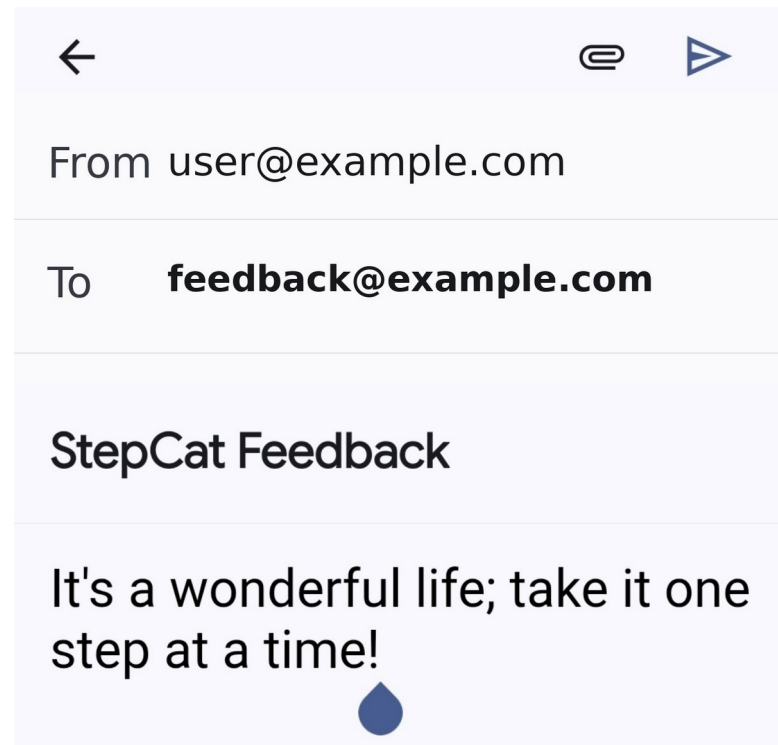

Figure: The default email app opens with the subject and message prepared. Addresses are generic examples.

Privacy note: Feedback is sent by email. StepCat does not send the message automatically or store it inside the app.

[Watch or download the StepCat v145 video tutorial](https://github.com/gatorball345-ux/StepCat-Profit-Calculator-/releases/tag/v145-video-tutorial): <https://github.com/gatorball345-ux/StepCat-Profit-Calculator-/releases/tag/v145-video-tutorial>

The Help drawer also includes a Watch Video Tutorial button. The current tutorial is an early working draft that can be used now and may be updated later for clarity or completeness. If the video link does not open, confirm that the GitHub release tag v145-video-tutorial has been published.

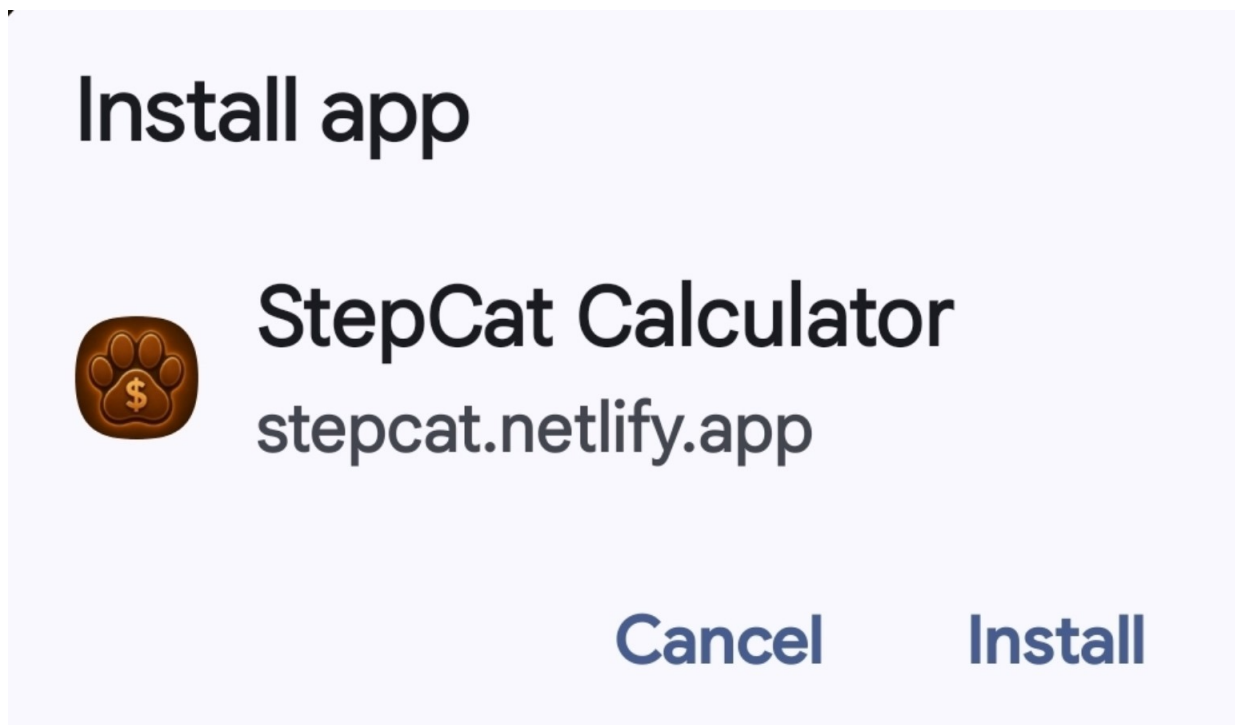

Installing StepCat or Adding to Home Screen

StepCat works as a normal webpage. On supported browsers, it can also be added to your home screen or installed as an app-style shortcut.

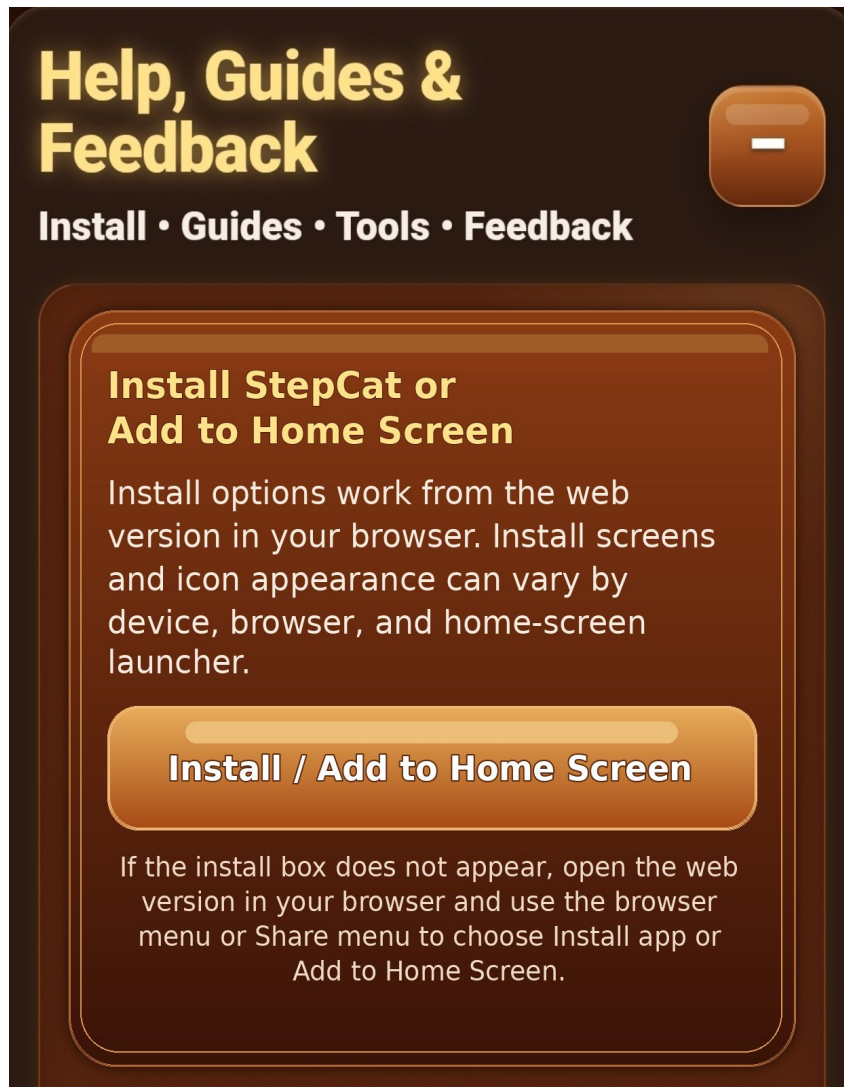

Exact wording varies by device and browser. On iPhone or iPad, open the web version of StepCat in Safari, tap Share, then choose Add to Home Screen. Browser install screens and home-screen icon appearance can vary by device, browser, operating system, and launcher. StepCat works in the browser either way.

Preferred method

1. Open StepCat in your browser.
2. From the web version, open Help, Guides & Feedback and tap Install StepCat or Add to Home Screen when available, or use your browser menu / Share menu.
3. Follow the confirmation screen shown by your browser.

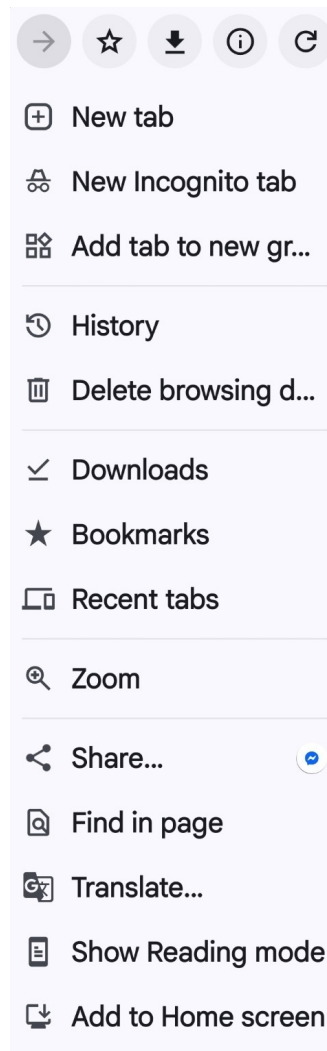

Example browser install confirmation. Your device or browser may show a different confirmation screen.

Install StepCat or Add to Home Screen remains available inside Help, Guides & Feedback when supported by your browser.

Manual browser fallback

If the Help install option is not available, open the web version in your browser, then use the browser menu / Share menu and look for Install app or Add to Home Screen. Browser wording varies.

Example browser menu fallback.

Add to Home screen?

Touch and hold an icon or tap Add to add it to the Home screen.

StepCat
1 x 1
