

StepCat

Quick Start Guide

StepCat Calculator v250.1

Quick workflow

Choose Estimate or Finalized.

Confirm Member or Non-Member.

Enter the record and calculation details.

Tap Calculate & Save.

Copy the saved A-M row into Game Records. For a forgotten game, insert a row above or below from inside the native Google Sheets table.

This guide explains the v250.1 app and native Google Sheets workbook workflow. Privacy-sensitive screens use clearly labeled generic examples.

1. Enter the record information

Add the game name, dates, date format, and payment or record type. Optional fields can remain blank when they do not apply.

Game & Record Information

These fields describe the game and copied spreadsheet row. Enter the information you have available.

A Game Name Optional

First copied column. Identifies the record in Saved History and the workbook.

Game Name

B Game Start Date Optional

Second copied column.

Selected start date: none

C Game End Date Optional

Third copied column. Choose the challenge ending date. It should be the same as or later than the start date.

Selected end date: none

Web **Date Format** Not copied

Controls how Start Date and End Date copy to your spreadsheet. Date Format is not copied as its own column.

MM-DD-YYYY

Game and record information

A Game Name Optional

First copied column. Identifies the record in Saved History and the workbook.

Pumpkin Prep Steps

B Game Start Date Optional

Second copied column.

10/13/2025

Selected start date: 10-13-2025

C Game End Date Optional

Third copied column. Choose the challenge ending date. It should be the same as or later than the start date.

11/02/2025

Selected end date: 11-02-2025

Web **Date Format** Not copied

Controls how Start Date and End Date copy to your spreadsheet. Date Format is not copied as its own column.

MM-DD-YYYY

F Payment / Record Type Optional*

Copied payment or record description. Examples include Cash, Points, Hybrid, and Free Game. Free, Free Game, and Free Entry copy as Free Game. Free Game payouts are chips/game credit, not cash.

Hybrid

Completed record details

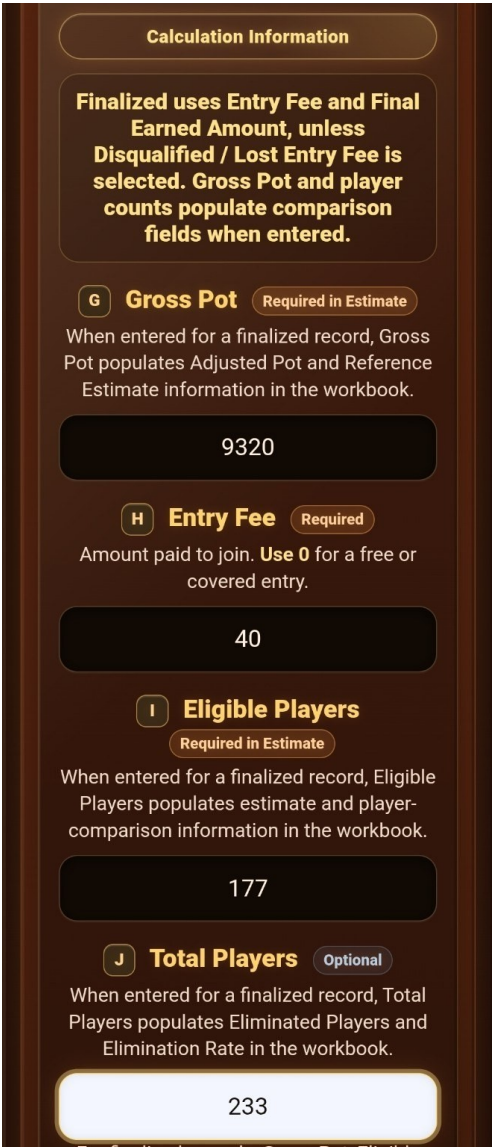

2. Confirm membership and enter calculation details

Tap the Member or Non-Member side to confirm it for the current entry. Then enter the pot, Entry Fee, and player information required by the selected mode.

Confirm Member or Non-Member

Non-Member uses 85% of Gross Pot. Member uses 100% of Gross Pot.

Enter calculation information

3. Complete a finalized result

Finalized mode uses the official total returned. Enter the full Final Earned amount, not only the extra profit.

233

For finalized records, Gross Pot, Eligible Players, and Total Players populate comparison and elimination statistics when values are entered.

K

Final Earned / Chips

Required in Finalized

Enter the total returned, not just extra profit. For a Free Game, enter chips/game-credit units awarded; they are excluded from cash-profit totals. If a paid return is equal to or below Entry Fee, StepCat treats it as a Draw unless Disqualified is selected. Gross Pot and player fields populate Reference Estimate columns when entered.

Entry Fee + Profit, e.g. 44.36

Example: \$40 entry + \$4.36 profit = \$44.36.

Profit: Final Earned above Entry Fee. Draw: a normal result at or below Entry Fee.

Disqualified: paid entries lose the full Entry Fee; Free Games record the status with 0.00 chips and no monetary loss.

Enter Final Earned Amount to calculate this result.

Final Earned is required in Finalized mode

K

Final Earned / Chips

Required in Finalized

Enter the total returned, not just extra profit. For a Free Game, enter chips/game-credit units awarded; they are excluded from cash-profit totals. If a paid return is equal to or below Entry Fee, StepCat treats it as a Draw unless Disqualified is selected. Gross Pot and player fields populate Reference Estimate columns when entered.

44.88

Example: \$40 entry + \$4.36 profit = \$44.36.

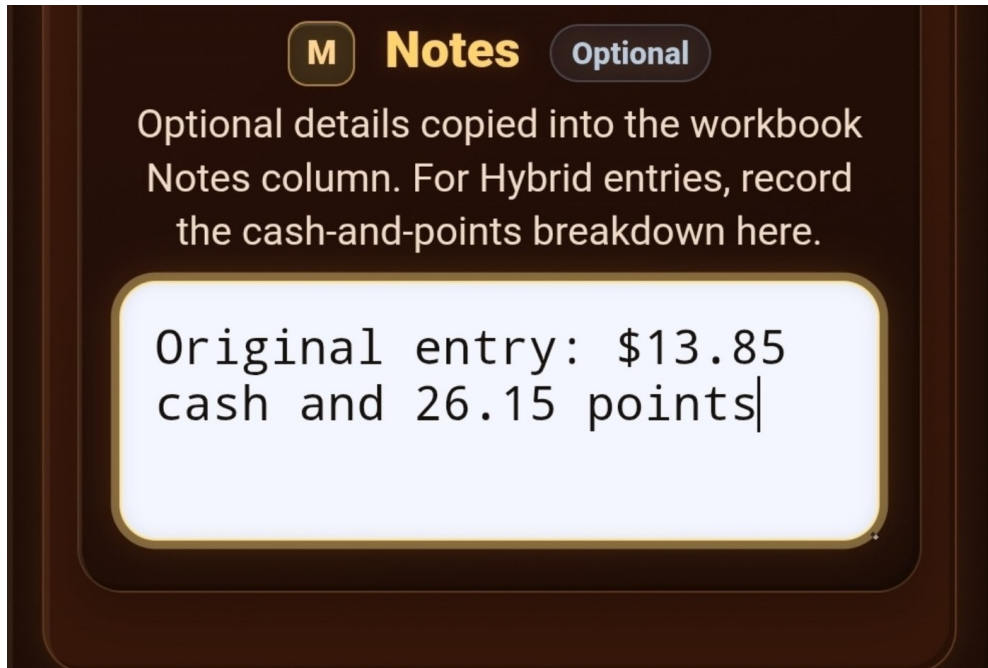

Profit: Final Earned above Entry Fee. Draw: a normal result at or below Entry Fee.

Disqualified: paid entries lose the full Entry Fee; Free Games record the status with 0.00 chips and no monetary loss.

Enter the official Final Earned amount

4. Add notes, then calculate and save

Use Notes for optional details such as a Hybrid cash-and-points breakdown. Calculate & Save validates the entry and stores one Saved History result.

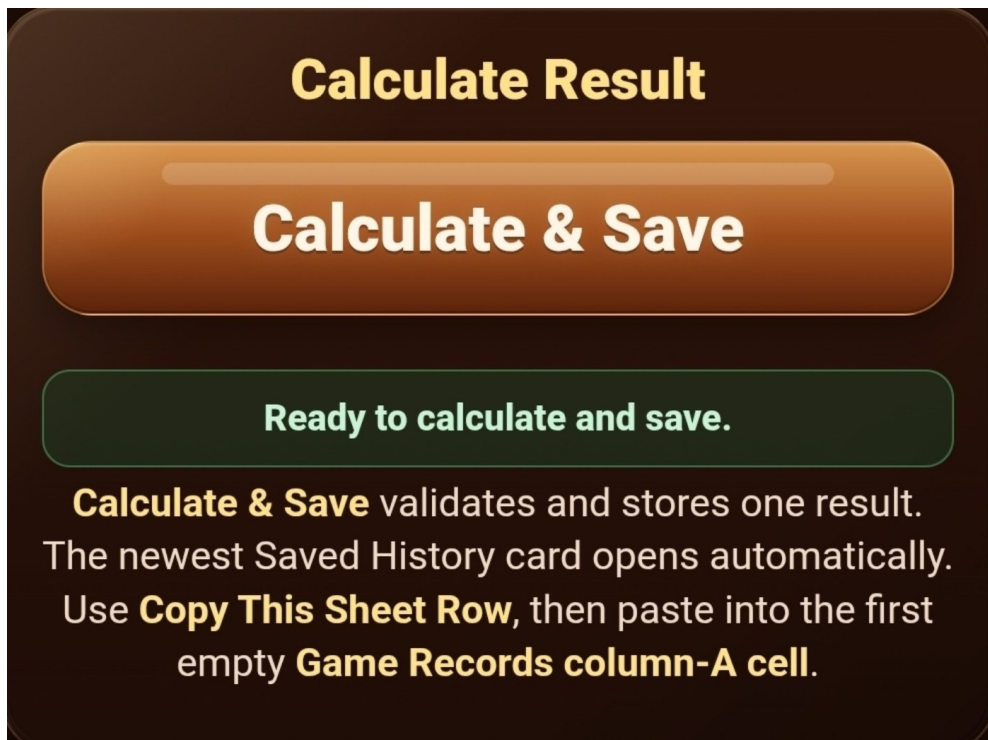

M Notes Optional

Optional details copied into the workbook Notes column. For Hybrid entries, record the cash-and-points breakdown here.

Original entry: \$13.85
cash and 26.15 points

Use Notes for cash-and-points details

Calculate Result

Calculate & Save

Ready to calculate and save.

Calculate & Save validates and stores one result.
The newest Saved History card opens automatically.
Use **Copy This Sheet Row**, then paste into the first
empty **Game Records column-A cell**.

Calculate and save the record

5. Review Saved History

The newest saved result opens automatically. Review the outcome, official amount, profit or draw, ROI, record details, and reference estimate before copying.

Result saved. Copy This Sheet Row is ready on the newest Saved History card.

Newest Saved History result

6. Copy the row into the workbook

Tap Copy This Sheet Row. Open your native StepCat Google Sheet and go to Game Records. For a new record, select the next prepared blank cell in column A beginning with A5. For a forgotten game, select a cell inside the table near the correct location and insert a row above or below. Paste into column A only and never overwrite N-Z. The inserted row automatically receives formulas, dropdowns, formatting, and visible borders.

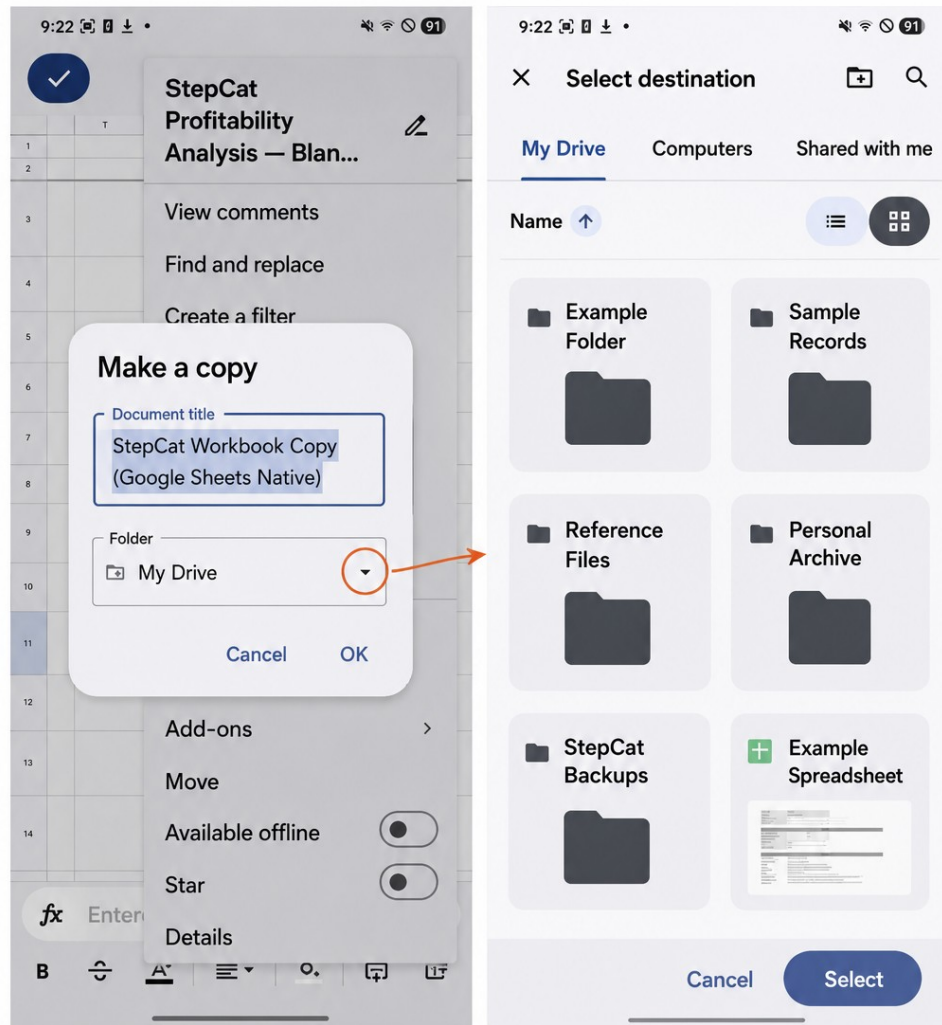

Pumpkin Prep Steps before copying the workbook row

Pumpkin Prep Steps after the sheet row is copied

7. Make your own Google Sheets copy

Tap Make a StepCat Google Sheets Copy. In Google Sheets, choose Make a copy. You may keep the suggested title or rename it. My Drive is the default destination; tap the arrow beside Folder only when you want to select another Google Drive folder. Tap OK to create the editable native workbook.

- 1** Tap **Make a copy**.
You can keep the title or rename it if you'd like. Tap the arrow next to "Folder" to choose where to save your copy.
- 2** Choose any folder in your Google Drive where you want to save your StepCat workbook, then tap **Select**.

i **Example only:** The folders shown above are generic examples for reference. Your Google Drive will show your own folders and files.
Do not use "Save As." No file format is required.
Tap "Make a copy" to create your editable native Google Sheets workbook.

Example only for privacy: the folders and files shown are generic placeholders. Each user will see their own Google Drive folders and files.

Do not use Save As. No file format is required. Save As exports the workbook instead of creating the native Google Sheets copy used by StepCat.

8. Follow the workbook instructions

The Instructions sheet explains the main workflow, result colors, carryover, forgotten-game insertion, formula recovery, the Google Sheets/manual fallback, migration, and which columns calculate automatically.

Workbook Instructions — Main Workflow and Color Key	
Updated v250.1 instructions. Editable records belong in Game Records A-M; Record Review is formula-driven.	
StepCat Workbook Instructions — v250.1	
Use this sheet as the reference for entering records, carrying totals forward, and understanding calculations.	
Start here	Enter or paste each new record in a prepared Game Records row beginning with A5. In Microsoft Excel, a forgotten game may also be added directly above or below an existing game by choosing Insert Table Rows Above/Below inside the Game Records table. Paste while the column-A cell is selected, not while a text cursor is editing inside the cell.
Editable columns	Use columns A-M for record information. Columns N-Z contain formulas and update automatically in prepared rows and in Excel table rows inserted inside Game Records.
Calculation fields	Use the fields that apply to the selected Estimate or Finalized mode. Other fields may remain blank when they do not apply.
Yellow input cells	All A:M input cells are yellow because they are editable. They remain yellow whether blank or filled.
Record Review	Record Review is formula-driven and should not be edited directly. Enter or revise records only in Game Records A-M. It assigns each non-subscription game a Game # and Game Records ID, shows the calculated result, review flags, and Notes. Prepared rows may remain blank until a matching game exists. Selecting a cell may show its formula in the formula bar; this is normal. Formula text should not appear as the displayed cell value.
Profit rule	Profit means Result Earned is above Entry Fee.
Draw rule	A normal completed paid game earning the Entry Fee or less is treated as a Draw with \$0.00 net profit. The exact raw estimate remains visible in Estimated Earned.
Loss rule	A monetary loss occurs only when Disqualified / Lost Entry Fee is Yes on a paid entry; the full Entry Fee is counted as lost.
Subscriptions	For the annual platform membership, select "Subscription — membership charge only" and enter the annual cost in Entry Fee. This is a non-game expense and must not be used for a free-entry challenge.
Free games	Select "Free Game — completed challenge/chips" for a completed free-entry challenge or a record that awards chips/game credit. Enter chips in Final Earned / Chips when known. When the estimate inputs are unavailable, Adjusted Pot / Chips and Estimated Earned / Chips display N/A instead of an error or misleading zero.
Summary	Summary uses exact counts and cash totals. Free Games are shown separately from paid-game Profit, Draw, and Disqualified counts, and their chips are reported in a separate non-cash total.
Game Comparisons	The paid table compares Member, Non-Member, Unclassified, and All Paid Games. A separate Free Game Chip Performance section shows completed, disqualified, chips-earned, eliminated-player, and elimination-rate statistics. Subscription rows are excluded.
Gross Profit Earned	The sum of positive paid-game cash profit before subtracting lost entry fees or membership fees. Free Game chips are excluded.
Net Game Profit	Gross paid-game cash profit minus total lost entry fees. Free Game chips are excluded from cash net profit.
Actual Running Net Profit	Running Net Game Profit minus current and carryover annual subscription or membership costs. Free Game chips remain separate.
Column Z colors	Column Z shows cumulative net game profit. Its color describes the current row's result or record type, not whether the cumulative total is positive or negative. Draw and Subscription rows may repeat the preceding total.
Light green	Profit
Light gray	Draw
Pale yellow / cream	Free Game / chips
Light blue	Subscription
Light red	Disqualified / Lost Entry Fee
Workbook Capacity	Rows 5-504 provide exactly 500 record rows. Row 505 marks the archive boundary; rows beneath it are inactive.
Starting Midyear	Enter prior net game profit, prior subscription costs, and prior completed-game count in Carryover Setup.
Manual Entry	All A:M input cells remain yellow to identify editable cells. Categorical fields provide dropdown choices, and all record information may be entered manually or copied from StepCat. Changes made later in A:M recalculate the row when its N:Z formulas are present.
InstructionsGame RecordsRecord ReviewSummaryGame ComparisonsBest Results	

Main workflow, Record Review note, and result-color key

Workbook Instructions — Carryover, Calculations, and v250.1 Updates

Forgotten-game instructions are green, the manual fallback is red, and migration guidance is blue.

Carryover	Enter prior totals once, then continue with only new records.
Prior Net Game Profit	\$0.00
Prior Subscription Costs	\$0.00
Prior Game Count	0
Step 1 — Note prior totals	Open the completed or archived workbook and note its ending Net Game Profit, subscription costs already paid, and completed-game count.
Step 2 — Enter once	Enter those three figures once in B29:B31. Do not create Game Records rows for the carryover values.
Step 3 — Continue records	Begin new records on Game Records row 5. Enter only activity that occurred after the previous workbook ended.
Step 4 — Check totals	Running totals and Summary should begin with the carryover figures and then add the new workbook's records.
Important	Use Carryover only when continuing from another workbook or starting partway through a year. Prior Game Count includes completed games only; exclude Subscription rows and unfinished Estimate rows. Do not re-enter prior games or prior subscription payments.
Calculations	Reference for how the workbook determines results and totals.
Member games	Adjusted Pot uses 100% of Gross Pot.
Non-Member games	Adjusted Pot uses 85% of Gross Pot.
Estimated Earned	Adjusted Pot divided by Eligible Players. The exact amount remains visible even when it is at or below Entry Fee and the accounting result is Draw.
Profit	Result Earned above Entry Fee; Net Profit is Result Earned minus Entry Fee.
Draw	A normal completed paid game earning the Entry Fee or less records \$0.00 Net Profit while preserving the exact Estimated Earned or Final Earned amount.
Disqualified	Paid entry: Final Earned / Chips and Result Earned / Chips should show \$0.00, and the full Entry Fee is recorded as lost. Free Game: the disqualification status is preserved, 0.00 chips are earned, and no monetary Entry Fee loss is recorded.
ROI	Net Profit divided by Entry Fee. When Entry Fee is \$0, ROI displays N/A because division by zero is undefined.
Running Net Profit	Prior Net Game Profit plus current-workbook cash Net Profit, accumulated row by row. Free Game chips do not change the total; Draw and Subscription rows may repeat the preceding total.
Subscription effect	A Subscription row is excluded from game counts and game results. Its cost is subtracted only in Actual Net Profit.
What changed in v250.1	v250.1 adds formula-safe Microsoft Excel table rows for inserting forgotten games, Record Review warnings for missing N-Z formulas, N/A safeguards for Free Games that cannot be estimated, and visible \$0.00 Final Earned values for existing disqualified records. The webpage and documentation now explain the Excel insertion workflow and the Google Sheets/manual fallback.
Adding a forgotten game in Excel	Click a cell inside Game Records, insert a Table Row Above or Table Row Below at the correct location, and enter or paste A:M. The table is designed to extend formulas, dropdowns, and formatting into the inserted row. Confirm that Record Review does not show "Formula columns missing."
Google Sheets or manual fallback	Some spreadsheet programs may not preserve Excel calculated-table behavior. Use the next prepared blank row, enter or paste A:M, then sort the complete A:Z record area by Start Date. If an inserted row ever lacks formulas, copy N:Z from the adjacent working row before entering data.
Migrating to v250.1	New users should begin with v250.1. Existing users should copy only populated Game Records A5:M cells into the v250.1 workbook, preferably as values only. Do not replace formula columns N-Z or copy entire sheets. Keep the older workbook as a backup until records, Record Review, and totals are verified.

Instructions **Game Records** Record Review Summary Game Comparisons Best Results

Formula columns N-Z calculate automatically

10. Use Record Review to check the workbook

Record Review is formula-driven and must not be edited directly. Enter or revise records only in Game Records A-M. Prepared rows may remain blank until matching games exist. Selecting a cell may show a formula in the formula bar; the cell itself should show its calculated value or remain blank, not display formula text.

Record Review — Formula-Driven Review and Totals								
Do not type or paste into Record Review. Blank prepared rows are expected until matching games exist.								
Record Review — Game Index and Field Review — v250.1								
Formula-driven view only — do not type or paste into Record Review. Enter or edit records in Game Records A-M. Blank rows are expected until matching non-subscription games exist. Selecting a prepared cell may show a formula in the formula bar; the worksheet cell should display its calculated result or remain blank.								
Game #	Game Records ID	Game Name	Calculated Result	Review Status	Blank Fields to Review	Notes from Game Records		
1	G-0001	Beyond Spectacular	Profit	No Highlighted Fields			Review Totals	
2	G-0002	Passport Chicago	Draw	No Highlighted Fields			Total Games	184
3	G-0003	Walk Your Way To The Top	Disqualified	No Highlighted Fields			Profit Games	129
4	G-0004	Steps of Honor	Draw	No Highlighted Fields			Draw Games	39
5	G-0005	StepBet Block Party	Draw	No Highlighted Fields			Disqualified Games	7
6	G-0006	Step Bet With Jenna	Profit	No Highlighted Fields			Free Games	2
7	G-0007	Strides For Juneteenth	Profit	No Highlighted Fields			Points Games	139
8	G-0008	Step Right Up	Draw	No Highlighted Fields			Cash / Hybrid Games	43
Instructions Game Records Record Review Summary Game Comparisons Best Results								

Formula-driven Record Review and exact review totals

Final workbook check

For a new game, paste into the next prepared blank cell in column A.

For a forgotten game, insert a row above or below from inside the Google Sheets table.

Keep formulas in columns N-Z unchanged; Record Review warns when they are missing.

Free Games may show N/A in N and O; disqualified games show \$0.00 in K.

Visible cell borders remain across the Game Records table.

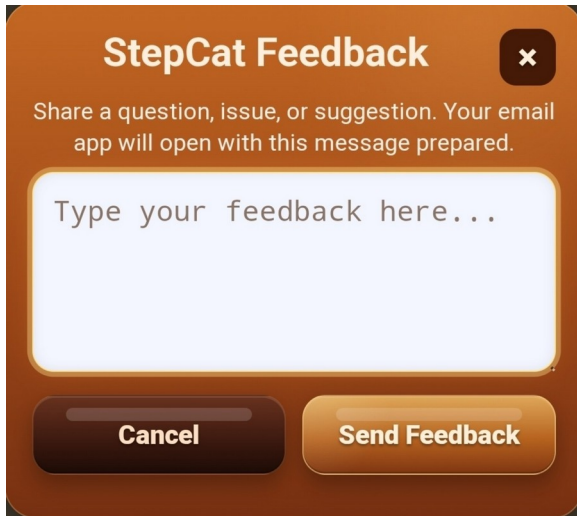

Subscription rows are workbook-only non-game costs.

Archive the workbook when the record area reaches row 505.

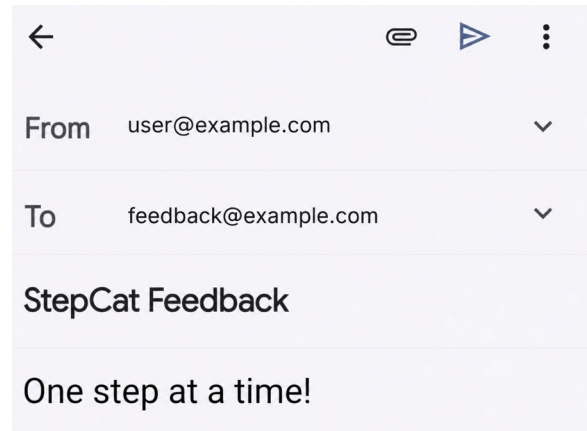

11. Send feedback from Help

Open Help (?), scroll to Guides & Downloads, and tap Write Feedback. The feedback form opens over the Help drawer, so Cancel returns to the same location.

1. Enter a question, issue, or suggestion.
2. Tap Send Feedback.
3. Review the prepared recipient, subject, and message in your email app.
4. Send the email, then swipe back or return to StepCat. Help remains open at the same location when the browser preserves the page.

The image shows a feedback form titled "StepCat Feedback" with a close button (X) in the top right corner. Below the title, it says "Share a question, issue, or suggestion. Your email app will open with this message prepared." There is a large text input field with the placeholder text "Type your feedback here...". At the bottom, there are two buttons: "Cancel" and "Send Feedback".

Enter a question, issue, or suggestion

The image shows a preview of an email that will be sent. It has a back arrow, a link icon, a share icon, and a menu icon at the top. The "From" field is "user@example.com" and the "To" field is "feedback@example.com". The subject is "StepCat Feedback" and the body text is "One step at a time!".

Email opens with the message prepared

Privacy note: The addresses shown in the guide image are generic examples. StepCat does not place a feedback email address in the workbook. The actual recipient appears only when the device prepares the email.

Get the public workbook: https://docs.google.com/spreadsheets/d/1STrfkd-GI7LL8BBlaPv6v3YtSv4oQKqP8LL_GvDmTj4/copy

Requires a free Google account. Mobile users should use the Google Sheets app; the Google Drive app is optional. Choose Make a copy—not Save As—so no file format selection is needed.

Google account and screenshot notes

If Google asks which account to use, select the account where the StepCat copy should be stored. The account list contains only accounts already signed in on that user's device.

Older workbook screenshots may show blue formula columns. In the native Google Sheet, N-Z may appear white or light gray. Always identify calculated columns by the N-Z headers, not by color.
